PROFESSIONAL SUMMARY

Fullstack Web Developer with experience in React, Next.js, TypeScript, REST APIs, AWS Lambda, Jest, Docker and CI/CD. Skilled in frontend/backend integration, API restructuring, testing, debugging and Agile delivery in enterprise environments. Hands-on experience with Java 21, Spring Boot, Maven and PostgreSQL.

CORE TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, HTML5, CSS3, SASS, Bootstrap, Tailwind
Backend	TypeScript, Java, Spring Boot, PHP, REST APIs, AWS Lambda
Databases	PostgreSQL, MySQL, Prisma ORM
Testing & Quality	Jest, TDD practices, Postman, Bruno, SonarQube
DevOps & Tools	Git, GitHub, GitHub Workflows, CI/CD, Docker containers, Jira, Confluence
AI-assisted Development	GitHub Copilot, MCPs, AI-assisted coding workflows
Ways of Working	Agile/Scrum, code reviews, pull requests, documentation, debugging, troubleshooting

PROFESSIONAL EXPERIENCE

Software Engineer | Critical Techworks | BMW Group

February 2026 – Present

- Developed frontend and backend features for applications within the MINI and BMW ecosystem, including cart and checkout related flows.
- Worked with React, Next.js and TypeScript on application interfaces, and with TypeScript APIs, integrations, business logic and AWS Lambda services on the backend.
- Restructured APIs and adapted contracts due to business logic changes, ensuring integration between frontend, backend and external services.
- Validated APIs with Postman and Bruno, analysed logs, debugged AWS Lambda services and supported troubleshooting in cloud environments.
- Developed and maintained unit tests with Jest, applying TDD practices when appropriate to improve quality and reduce regressions.
- Worked in a multi-repository GitHub setup using Git, branches, pull requests, code reviews, GitHub Workflows, CI/CD, Docker and SonarQube.
- Used GitHub Copilot and AI-assisted tools for coding, refactoring, testing and code analysis, while manually validating generated suggestions.
- Used Jira and Confluence for task tracking, bug management, technical documentation and Agile collaboration.

Fullstack Web Developer | Real Vida Seguros

February 2025 – February 2026

- Developed and maintained internal web applications and business tools using React, Next.js, PHP, MySQL, WordPress, Elementor and Crocoblock.
- Built solutions for campaign management, customer data, online communications, event organisation and QR Code validation.
- Worked closely with business users to understand needs, implement practical solutions and support application usage.
- Contributed to responsive interfaces, backend logic, database operations and internal process automation.

Fullstack Web Developer | Creative Minds_

September 2024 – February 2025

- Created and maintained websites using React, PHP, JavaScript and WordPress / Elementor.
- Worked on page layouts, CMS/Backoffice maintenance, newsletters and responsive web interfaces.
- Contributed to client projects including institutional websites, business websites and content-driven platforms.

Senior Specialist | Operations, Back Office, Digital Archive & Physical Security | BES / novobanco

1999 – July 2024 | Lisbon, Portugal

- Progressed through operational, supervisory and specialist roles across banking back office, mortgage credit, document management and physical security.
- Managed mortgage-related processes, including insurance, guarantees, property valuations, financing operations and interest calculations.
- Coordinated physical and digital archive operations and collaborated with IT teams on a digital archive transformation platform.

PROJECTS

Alexa Library

[Java](#) | [Spring Boot](#) | [Maven](#) | [PostgreSQL](#) | [React](#) | [REST APIs](#)

[Live](#) | [GitHub](#)

- Fullstack library management application developed collaboratively.
- Built with Java 21, Spring Boot 3.4.5, Maven, Spring Data JPA, Spring Web, PostgreSQL and Lombok.
- Developed most of the frontend and contributed to architecture, class design and API interactions.
- Implemented and integrated rental, purchase, return and extension flows using OOP principles, REST API thinking and relational database modelling.

Issue Tracker

[Next.js](#) | [React](#) | [TypeScript](#) | [Prisma](#) | [Relational Database](#) | [NextAuth](#)

[Live](#)

- Fullstack issue management application for software projects.
- Includes issue CRUD, assignment, filtering, sorting, status management, authentication, protected routes and dashboard metrics.
- Uses Prisma ORM with relational database modelling and migrations, plus responsive layout for desktop, tablet and mobile.

Application Center / Campaign Manager

[PHP](#) | [MySQL](#) | [Tailwind](#) | [PHPMailer](#) | [PhpSpreadsheet](#) | [QR Code](#)

[GitHub](#)

- Internal professional project developed in an insurance context.
- Includes campaign management, content creation, customer database operations, spreadsheet import, e-delivery, reporting, tracking and event management.
- Uses PHP/MySQL with Tailwind styling and supporting libraries for spreadsheets, email delivery and QR Code generation.

Game Hub Frontend

[React](#) | [TypeScript](#) | [Chakra UI](#) | [Axios](#) | [React Hook Form](#) | [Zod](#)

[Live](#)

- Frontend gaming catalogue application integrating a games API with filtering and sorting by platform, release date, popularity and rating.
- Uses custom hooks, Axios, state management, form validation and responsive design.

Game Hub Backend

[PHP](#) | [MySQL](#) | [MVC](#) | [Ajax](#) | [Bootstrap](#) | [Security Practices](#)

[Live](#)

- Personal graded backend project developed during the Fullstack Web Developer certification.
- Includes registration, login, password recovery, user/admin areas and user game library management.
- Built with PHP, MySQL and MVC architecture, including CSRF and SQL injection protection.

World of Warcraft Daily

[React](#) | [JavaScript](#) | [HTML5](#) | [CSS3](#) | [SASS](#)

[Live](#)

- Personal graded frontend project developed during the Fullstack Web Developer certification. Status: under refactoring.
- Gaming news website focused on World of Warcraft content, built with React, state management, conditional rendering and SASS.

EDUCATION / CERTIFICATION:

Fullstack Web Developer | [FLAG](#) / [RUMOS](#)

September 2022 – November 2023

12º Grade - Information Technology | [Escola Secundaria Maria Amália Vaz de Carvalho](#)

July, 2001

POSITIONING:

My current profile is strongly aligned with Fullstack development, with recent enterprise experience focused on React, Next.js, TypeScript, APIs, backend integrations, business logic, AWS Lambda, testing, debugging, CI/CD and Agile delivery.

At Critical Techworks, within the BMW/MINI ecosystem, I have worked on frontend and backend features for enterprise applications, including cart and checkout related flows, API restructuring, integration between frontend, backend and external services, unit testing with Jest, GitHub Workflows, Docker, SonarQube, code reviews and technical documentation.

In addition to my professional experience, I developed Alexa Library, a Fullstack Java project built with Java 21, Spring Boot, Maven, PostgreSQL and React, applying object-oriented programming principles, REST API design, relational database modelling and Fullstack application thinking.

Overall, I bring a strong React/Next.js and TypeScript background, solid API and backend integration experience, enterprise delivery practices and hands-on Java/Spring Boot project experience.
